In re Patent Application of:

Jung-han LEE

Application No.: Unassigned

Group Art Unit: Unassigned

Filed: March 25, 2004

Examiner: Unassigned

For: COLOR REGISTRATION CONTROL METHOD UTILIZING DENSITY SENSOR

**PETITION FOR COLOR DRAWINGS UNDER 37 CFR §1.84(A)(2)**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

It is respectfully petitioned that the Office accept color drawings for figures 6 and 8-26B in the above-identified patent application. Color drawings are necessary to accurately disclose the subject matter sought to be patented. In particular, the red, black, and white bars in each of figures 6 and 8-26B are necessary to illustrate the density of error in the left and right-half patterns of the first and second patterns of each registration pattern. Without color drawings, the variable development pattern of the left and right-half patterns is difficult to determine.

In support of this petition, the Applicant submits the following:

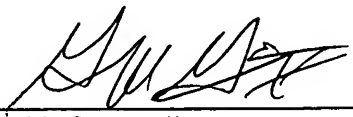

- (1) Fee set forth in 37 CFR § 1.17(h);
- (2) Three (3) sets of color drawings;
- (3) A black and white photocopy that accurately depicts the subject matter shown in the color drawings;
- (4) The specification contains the following language before the description of the drawings: "The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee."

For the foregoing reasons, it is respectfully submitted that color drawings for figures 6 and 8-26B in the above-identified patent application be allowed.

Respectfully submitted,

STAAS & HALSEY LLP

Date: March 25, 2004
